Introduction to Case Competition

VERSION 3.0 — APRIL 2024

# Agenda

- Foreword
- Introduction
- The Case Study
- Presentation Format
- STRIVE Presentation Tips

# Foreword

Business competitions can be daunting, especially to those new to the experience. At Strive, we want to ensure that everyone feels confident and excited when they enter through the venue's doors. Therefore, we have compiled the following presentation to provide you with the necessary resources to perform to the best of your abilities!

# Introduction

An aerial photograph of a university campus, overlaid with a semi-transparent blue filter. A wide, light-colored walkway runs down the center of the image, flanked by dense green trees. In the background, several modern university buildings are visible, including a prominent clock tower on the left. The sky is a clear, bright blue with scattered white clouds.

# What is a Case Competition?

- Case competitions provide a problem simulation that mimics the reality of corporate affairs through an analytical lens.
- During the competition, you will all receive a case study based on problems that you could encounter in the real world. It will be about a specific company or market and the problem it wishes to resolve.
- Your team must identify these issues and develop a resolving recommendation strategy. Then, you must skillfully present your idea(s) to a panel of judges.

# What should I expect?

A Case Competition exposes students to many issues found in the realm of commerce. Your team must work together to analyze problems and create resourceful and innovative solutions. These solutions will need to be put together in presentation slides. Your team must then present your analysis to a panel of professionals.

For additional tutorial, please visit our sister organization Prosper's [YouTube channel](#) and attend the pre-conference preparation webinar.

# The Case Study

An aerial photograph of a university campus, likely the University of Washington, showing a central green lawn and walkways. The image is overlaid with a blue semi-transparent filter. The text "The Case Study" is written in white, sans-serif font across the middle of the image.

# What is a case study?

A case study is an account of a real or hypothetical scenario about a specific company or market, its background, its strengths, and the problem it wishes to resolve.

You can find examples of previously presented cases [here](#) and [here](#).

# Analyzing a Case

Before stepping into the competition, everyone on your team should have an assigned role. These roles differ depending on the quantity of members, including: Analysis of Company/Market, Key Issues, Recommendations, Mitigation, etc.

Remain aware of your assignment and take note of any information in the case that pertains to your role.

# Reading a Case

A good practice for case analysis is a 15 minute silent read.

While there will likely be more than 15 minutes worth of information, this time constraint will motivate you to be particular with relevant points, paying extra attention to the first and last page.

Furthermore, make sure to take notes either by yourself or collaboratively with your team members while reading the case!

# Case Discussion

Following this 15 minute read, share your opinions and thought process as a team, and come up with a cohesive plan on how to tackle the issues detailed in the case.

After that, everyone is free to focus on their specific portions of the slides, with a pre-set slide template to avoid starting from square one.

# Important Aspects to Consider

- Events that lead up to the issue
- What the case is prompting
- Potential competitors
- Consumer information
- Available alternatives
- Financials
- Industry

# Presentation Format

An aerial photograph of a university campus, overlaid with a semi-transparent blue filter. The image shows a wide, paved walkway running through the center of the campus, flanked by lush green trees. In the background, several modern university buildings are visible, including a prominent clock tower on the left and a large, multi-story building on the right. The sky is filled with soft, white clouds, suggesting a bright but slightly overcast day. The overall scene conveys a sense of a well-maintained and vibrant academic environment.

# The Essential Elements

In order to show the judges the steps you have taken to reach your final strategy, as well as how you plan to execute the plan, the following are vital:

1. Introduction and Issue Analysis
2. Internal and External Analysis
3. Recommendations
4. Implementation and Financials
5. Risks and Mitigations
6. Summary/Conclusion

# Introduction and Issue Analysis

Introduce the problem in a way that is succinct and clear. The problem statement should invoke excitement, curiosity, and inspiration.

Show an understanding of the underlying problems that the business must face. Focus on the issues and set the stage for recommendations.

## COMPONENTS

- Title Page
- Agenda/Overview of Presentation
- Problem and Topic Introduction
  - Identify Key Issues
  - Problem Statement: a concise description or question of the issue is addressed
    - (i.e. How can we establish a market for this new product based on current consumer trends?)
- Objective / Goals

# Internal and External Analysis

## INTERNAL ANALYSIS

### 1. SWOT Analysis

Strengths

Weaknesses

Opportunities

Threats

### 2. Issue Identification

## EXTERNAL ANALYSIS

### 1. PEST(LE) Analysis

### 2. Porter's Five Forces

### 3. Competitive Analysis

### 4. Consumer Analysis

# Recommendations

This is a high level strategy of how the company will solve its issues, according to your analysis. A professional recommendation requires:

How the company will solve its problems

What the client needs to do

Why the client needs to do this

Who will be involved in executing this plan

# Recommendation Tips

3

Aim for  $\approx$  3 recommendations

Unique and valuable position

*(Is anyone else doing the same thing? Do customers want this?)*

Create a strategic “fit” across the business

*(Are different parts of the business plan supporting each other?)*

# Recommendation Tips – Continued

If necessary, reiterate your findings, be it internal or external, and explain how your recommendations address this.

Solutions should align with business capabilities (SWOT) as well as take into account industry and situational factors (PESTLE, consumer, and competitor analysis).

# Implementation and Financials

A plan comprised of tactics and details that will make the recommendation into a reality.

A professional implementation requires:

Breakdown into  
detailed steps

Set a  
timeline

Consider the  
financials

# Implementation Details

## IMPLEMENTATION PLAN

- Break the strategy into actionable steps
- 4Ps Marketing Mix (Place, Product, Promotion, Price)
- Be realistic and reasonable

## IMPLEMENTATION TIMELINE

- Assign proposed strategies to a time frame
- Timeline should follow the scale of fiscal periods, typically by quarter

# Implementation – Example

Recommendation	Steps	Resources	Costs	Timing	Key Risks
Recommendation #1 “Fiji Water CSR Campaign”	1. Eco-friendly packaging	Biodegradable plastic or paper specialists and factories	\$75,000 USD	Approximately 6 months	Packaging might receive backlash from consumers
	2. Community outreach programs	Local outreach coordinators	\$80,000 USD	Approximately 18 months	Overextending resources or not providing enough
Recommendation #2 “Fiji Recycle Program”	1. Implement a mobile app 2. Contact local recycling centers	Partnerships with municipal governments and recycling companies	\$75,000 USD	Approximately 20 to 24 months	Low program user engagement rate

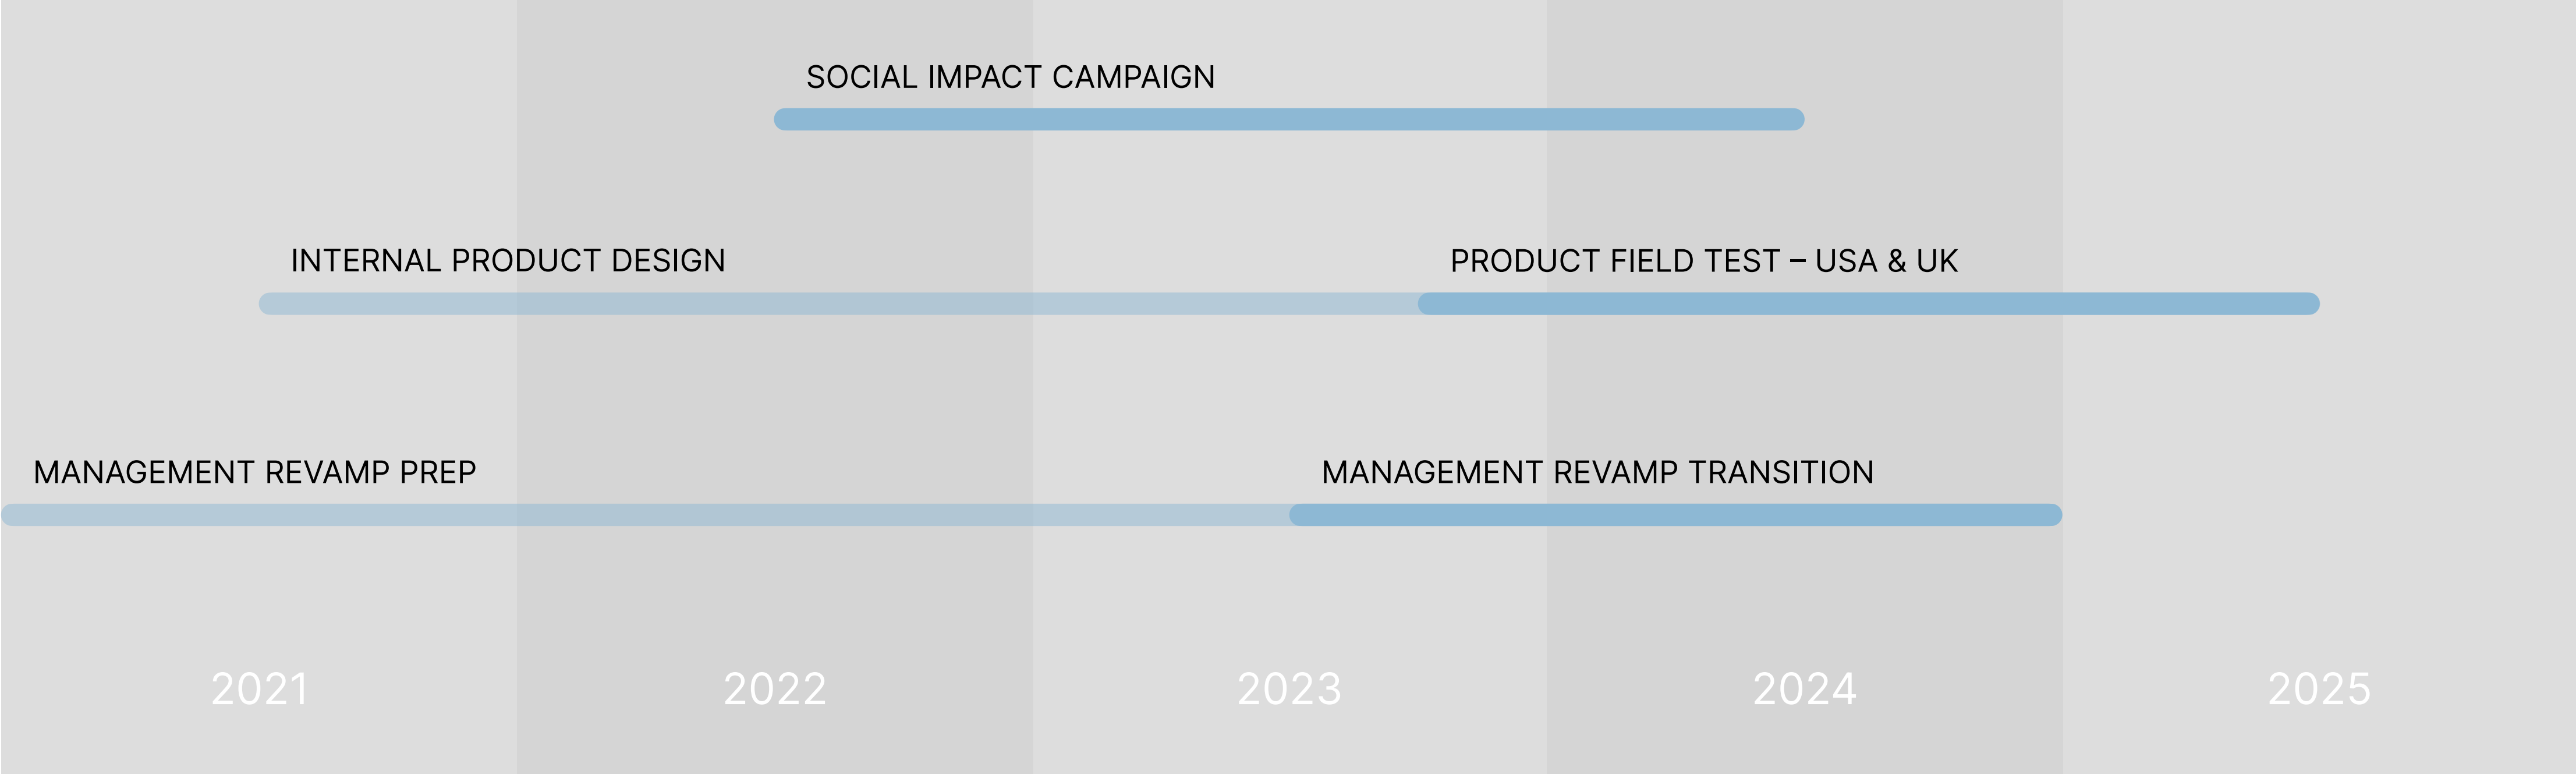

# Implementation Timeline

An implementation timeline can help illustrate your overall strategy more clearly through a linear medium.

# Implementation Timeline - Example

# Financials Details

Included in your implementation is a brief financial analysis that:

- Outline costs associated
- Provide financial justification (business benefits, economic profits, opportunity costs)
- Breakdown costs into two categories – one-time cost and recurring costs

# Financials Tips

## BONUS

Because spending money always has a negative connotation, try to convey the benefits they provide!

Item	Cost (in \$ Million USD)
Taxes and other legal fees	8
Property, Plant, and Equipment	15
Training Costs	5
Misc.	9
Total	37

Item	Benefit (in \$ Million USD)
New Products	8
Cost Savings in the Long Run	15
Added Benefits	40
Government Subsidies	5
Total	68

# Financials – Cost Breakdown

Cost Breakdown	Step 1	Step 2	Step 3	Step 4	Total
One-Time Cost (or) Upfront Cost	\$15,000	\$35,000	\$5,000	\$65,000	\$120,000
Recurring Cost (on an annual basis)	\$40,000	\$20,000	\$35,000	\$10,000	\$105,000 per year
First Year Cost	\$55,000	\$55,000	\$40,000	\$75,000	\$225,000

# Risks and Mitigations

Your risks and mitigations slides should outline plausible risks of your proposed strategy as well as a comprehensive plan of how to mitigate them.

- Plan to address pitfalls of the recommendations your team has presented
- Outline the severity of risks and potential points of mitigation
  - *Present in a table format outlining the probability, severity, and method of mitigation for each risk*

# Risks and Mitigation - Example

Risk	Probability	Severity	Mitigation
Risk 1	LOW	MODERATE	Avoidance Strategy 1
Risk 2	HIGH	EXTREME	Avoidance Strategy 2
Risk 3	MED	LOW	Avoidance Strategy 3

An aerial photograph of a university campus, overlaid with a semi-transparent blue filter. A long, straight walkway runs down the center of the image, flanked by dense green trees. In the background, several modern university buildings are visible under a cloudy sky. The text 'Strive Presentation Tips' is centered in white, sans-serif font.

# Strive Presentation Tips

# General Tips

- Confidence is key
- Talk at a steady pace
- Project your voice with clarity
- Employ body language and eye contact, even in a Zoom call
- Aim for a strong hook and conclusion
- Include professional visuals
- Wear business attire
- Greet the judges before your presentation and thank them afterwards
- Don't forget to smile

# Aesthetics

While your content serves as the biggest component of assessment, ensuring your pitch deck is clean and understandable will help judges along the way of awarding you maximum points!

If you feel unsure where to start, begin with a template. You can find a compilation of such slides [here](#) or [here](#).

# Organization

Some presentation has used the components shown down below to indicate the present topic. These are called breadcrumbs and are encouraged within case competition decks, to highlight content.

Typically, they are titled in the master slides according to the essential element of the presentation.

Example:
